PROFILE

I have 9 years of IT experience, spanning across Retail, Life-sciences, Pharmaceutical and Telecom Software domains. Currently working as Senior Consultant with IBM Ireland Product Distribution Limited, Singapore Branch.

I have been involved in all phases of the Systems Development Life Cycle including define, design, development, test, deployment, and support and maintenance for IBM Sterling Commerce (CPQ and OMS).

I'm a _self-taught and passionate Front-End Developer_ with intermediate knowledge of back-end technologies.

I have been _self-learning_ Front End Development for the past 7 months. I have taken courses on FreeCodeCamp, Codecademy and Teamtreehouse to pursue a career in Front-End Development.

- Involved in submitting Project Estimations for Sterling OMS project. Worked on POCs involving various modules of Sterling OMS such as UI Customisations, Agent Architecture, DOM, GIV etc

IBM Singapore - Associate Consultant
Aug 2015 - Oct 2015

This project involved design and setup of IBM Control Center (ICC) for one of the leading bank in South-East Asia. The client wanted to setup ICC to manage their Sterling Connect:Direct Servers.

Responsibilities included but are not limited to :

- Installation and configuration of ICC on UAT and Production Servers.
- Creation of custom rules, DVGs, SLCs etc on both UAT and Production Servers.
- Creation of scripts to create custom rules, users, managing servers in ICC
- Installation and Configuration of IBM Sterling External Authentication Server to implement extended authentication to ICC using LDAP.
- Configuration of Cognos Reports and Connection for IBM Control Center
- Tuning of the Production Server
- Installation and Configuration documentation for IBM Control Center, IBM Sterling External Authentication Server

Astrazeneca, Macclesfield, United Kingdom - Release Manager
Sep 2011 - Mar 2012

- Involved in the Release Planning and Co-ordination for the Ariba OnDemand and Change Demand suites that were developed for the client into Client network.
- Main responsibility was to configure the Configuration management tool on which the code packages will be stored and deployed later on during the release.
- It also involved Co-ordination with different stakeholders to understand the schedule and plan the release as per the schedule etc.

Sage, Newcastle Upon Tyne, United Kingdom - Consultant
Sep 2010 - Apr 2011

- This project involved design and launch of the Accounting Software products developed by client for Small-Scale and Mid-Scale Business firms in UK. Comergent had the profile, product, catalog, pricing and Configurator modules implemented and interfaces with the downstream order management and CRM Systems.
- This project involved the creation of service contracts and maintenance contracts for the Sage Accounts Products, Sage 50 Accounts Products, Sage 100 Products, PSPL products etc. The main task was to create the products and configure them according to the market requirement using the Sterling Visual Modeler and Sterling Configurator module of Comergent.
- As a Sterling Configurator Consultant, my main role was to create and develop products using the Sterling Visual Modeler and Sterling Configurator, verifying the Configuration Rules written, Configuration Validation, and Unit Testing of the models.
